EDUCATION

- 2016 - Present  **BE (Hons) at Myanmar Institute of Information Technology, Mandalay**
- 2019 - 2020  **Diploma In English at University of Foreign Languages, Mandalay**

WORK EXPERIENCES

- 2022 - Present  **Web Developer - CMS**
Work From Home
I am working as a web developer at Openfor.co IT team since June 2022. Openfor is a startup partnership development company based in Japan. My main priorities are to help achieve company's goal using CMS platform called WIX. I have to collaborate and brainstorm with Design/IT team to ensure high-quality implementation of the new features for the company's website. Assist with the continued development and maintenance of the company's database. Maintain and troubleshoot technical issues related to company's website. Test and evaluate new technologies and conduct research on them.
- 2021 - 2022  **Web Developer**
Self Employed
I have been learning web development since 2021 and developed a variety of projects for learning purpose and better experiences.
- 2018 - 2018  **WEGO Java Project**
MIIT
Me and my friends developed Java school projects called "WEGO" and got an A grade. On that project, I was assigned to do Presentation, logo design and user interface designs.

PROJECTS

2022 - 2022

Laravel Applications Development

Madalay

• Recently I am developing a platform call Poemidio. This project is about to deliver poems between poem lovers. This project is developed with Laravel, MySQL, and Spatie Laravel permission package and more features are coming.

Website link: <http://testlara.herokuapp.com>

• For My API knowledge, I developed a movie website using laravel and themoviedb Api. It resumes themoviedb api with bearer token and developed with laravel, tailwindcss and livewire.

GitHub repo: <https://github.com/Y2theK/laravel-movies-website>

• I developed a small Restruant System together with my teacher after I learned basic Laravel.

GitHub repo: https://github.com/Y2theK/AP_restruant

2021 - 2022

Web Application Projects

Madalay

I developed a couple of PHP Applications using Custom PHP and MySQL.

• "Online Quiz System"

• "Blog Platform"

• "Simple POS system "

GitHub Repo for online quiz system:

GitHub Repo for Blog Platform:

<https://github.com/Y2theK/php-simple-blog>

2021 - 2021

Personal Website Projects

Madalay

After I studied Web Development Foundation, I developed websites using HTML, Vanilla CSS, Sass and Vanilla Js and other JavaScript libraries.

Portfolio Project for a nurse:

<http://y2theK.github.io/tgno> Website for SASS Software

Services <https://y2theK.github.io/sass-software-service/>

2021 - 2021

Other Projects

Madalay

• "Wishing Box Project " and "World Map Project" with my friend. Those are Arduino based projects and we developed with Arduino Uno, ultrasonic sensor and many toolkits.

• I developed some widow form projects with C#.NET named "Blood Bank Management" and "Restaurant Management System".
